## JESUS GREEN BOAT PUMP-OUT STATION

### List of Improvements

1. Replace existing foul pump – Selwood 80C and electric motor. Divert vacuum discharge line to roof.
2. Drinking water point in pump-room – move from present location (near foul disposal point)
3. Large Elson disposal hopper to replace existing sluice/toilet. Include tap and hose for Elson wash-down.
4. Replace existing small air extractor fan with 6" unit linked to electric light, with over-run.
5. Larger drinking water take-off tap at riverside cabinet – 22 mm. or 2 No. taps.
6. Replace 1 ½ " 'brown' foul extraction hose. Ref. 01015
7. Replace probe valve assembly (on end of extraction hose). Ref. 01440
8. Full electrical survey.
9. Repairs to stairway lighting and cabinet lighting

-2-

10. Fit additional mooring bollard.

11. Redecorate internal / external wall and door. Replace door handle.

12. ? hand basin & percussion taps

13. Hand wash soap dispenser.

14. Work to hard standing in front of riverside 'cupboards' to reduce puddles of water.

15. Set up pump service contract.

16. Replace coin operated Pay-to Use control box.

17. Stainless steel lining to walls. Replace plumbing using chromed pipe.
